DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a mobile communications system in which frequencies are allocated, classified in class 455, subclass 446.
- II. Claims 14-19, drawn to a base station device, classified in class 455, subclass 561.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I. Claims 1-12 and Group II. Claims 14-19 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this instant case, invention Group I has separate utility such as for use in detection of a mobile communications system in which frequencies are allocated whereas Group II has separate utility such as a base station device. See M.P.E.P. § 806.05(d).
3. Because these inventions are distinct for the reason given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated proper.
4. A telephone call was made to Mr. Brian S. Myers on 08/15/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2686

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
